## Now Hiring

# NATURAL RESOURCE TECHNICIANS

**Job Summary** → A Natural Resource Technician is a person whose job is to perform a variety of basic tasks within the field of environmental science. While this is an entry level position requiring some education, a candidate must be in good physical condition because they will be required to perform manual labor within conditions that are sometimes less than ideal, such as working outdoors in inclement weather. They are responsible for knowing company established safety rules and regulations.

**Essential Duties** → 1. Perform all work in an efficient and timely manner. 2. Operate and maintain equipment safely at all times. 3. Loading and unloading materials and equipment at job sites. 4. Lift aluminum boats on racks on top of trucks and tie them down. 5. Remove plant vegetation and assist in the performance of aquatic service operations.

**Education & Experience** → Prior aquatic or landscaping experience and skills; A (BAS) Bachelor's of Applied Science degree preferred.

**Job Knowledge, Skills & Abilities** → Ability to work with others and follow instructions and complete tasks in a timely manner.
